

Survey Question Configurator

Administrator Manual

❖ Software Requirements

1. Microsoft SQL Server 2016 (SQL Server 13).
2. Microsoft .NET Framework 4.6

❖ Files List

Please check that all following files are provided:

Folder Name	File Name
Survey Configurator	CreateDatabase.sql
Survey Configurator	DatabaseOperations.dll
Survey Configurator	DatabaseSettings.dll
Survey Configurator	ErrorLogger.dll
Survey Configurator	QuestionManager.dll
Survey Configurator	SurveyQuestions.dll
Survey Configurator	SurveyConfiguratorApp.exe.config
Survey Configurator	SurveyConfiguratorApp.exe
Survey Configurator\ar	SurveyConfiguratorApp.resources.dll
Survey Configurator\en	SurveyConfiguratorApp.resources.dll

❖ Installation Process

1. Run **CreateDatabase.sql** script on your SQL server management system.
 - A new database named “Survey” should be created.
2. Open **SurveyConfiguratorApp.exe.config** using your preferred text editor.
3. Modify the following attribute according to your SQL server

key	value
DatabaseServer	Database server address
DatabaseName	Created survey database name
DatabaseUser	Database username
DatabasePassword	Database password

4. Run **SurveyConfiguratorApp.exe**
 - The application should run successfully

❖ Error Log

In case of any unexpected behavior or error:

1. Find error.log file at the same folder as SurveyConfiguratorApp.exe.
2. Open error.log file using your preferred text editor.
3. Errors are sorted according to occurring time.
